Why is Theradome® different?

quality
— OVER —
~~quantity~~

Theradome® delivers the most powerful OTC device treatment available.

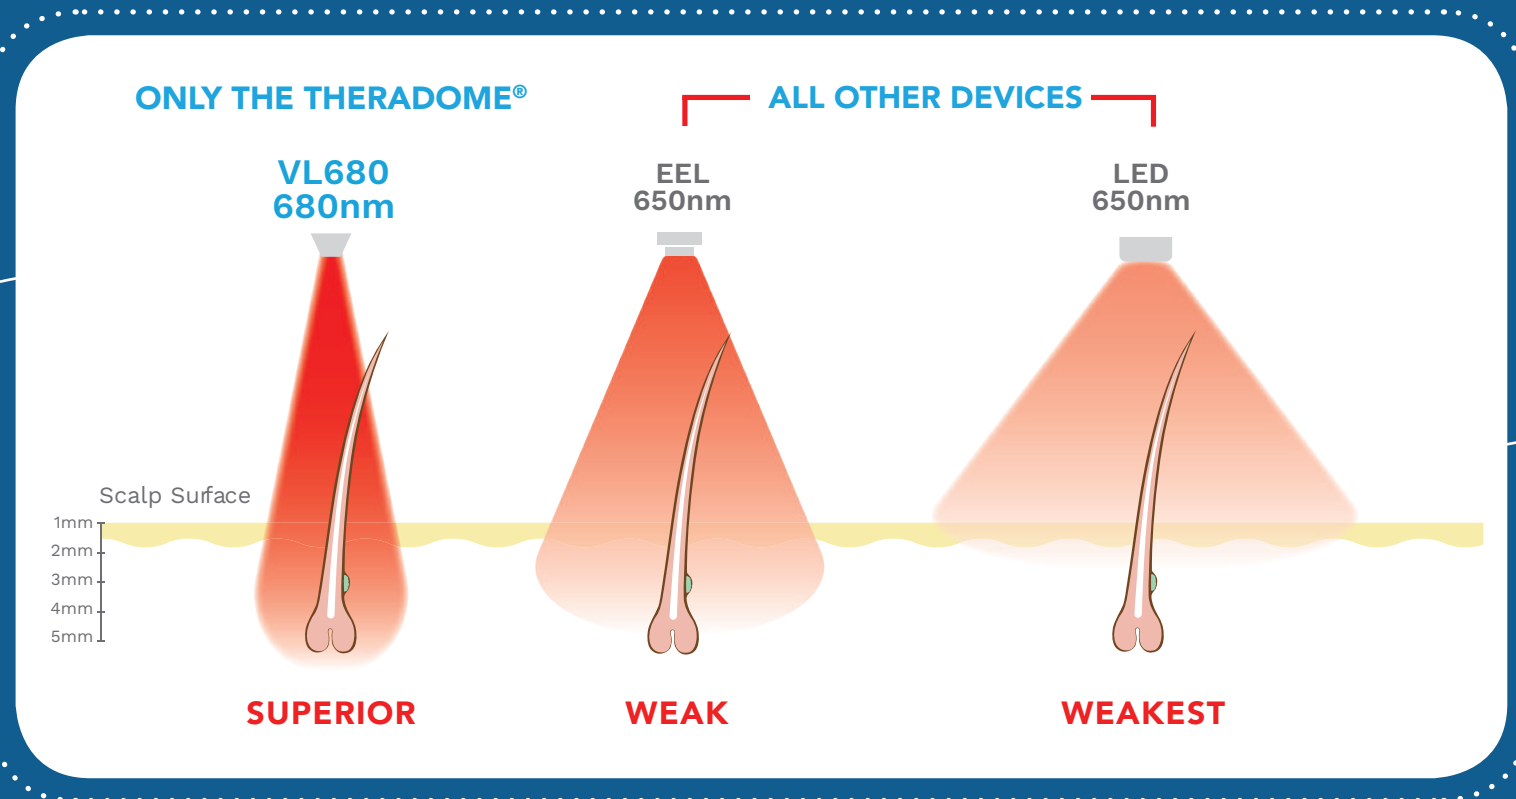

Theradome's proprietary VL680 Laser is the deepest penetrating FDA-cleared laser available to those suffering from hair loss. The fact is, when more joules are transferred to the scalp, hair follicles receive greater growth stimulation.

Why is Theradome® different?

The less divergent a beam of light energy, the more focused it is and the greater penetration and absorption it will have. The VL680 is 2.4x less divergent and therefore more focused, which allows for better penetration.

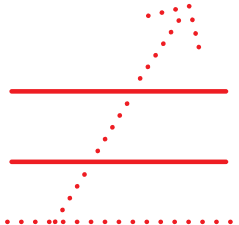

What does this mean? *Theradome® delivers stronger results faster*

IT REALLY WORKS! *Real people, real results*
